

Friday 22<sup>nd</sup> June 2018

This week we have gone under the sea looking at some of the creatures that live there. We have shared non-fiction books about jellyfish, sharks and octopus to find out facts and have enjoyed reading a range of stories such as; *Shark in the Park*, *Shark in the Dark*, *Tickly Octopus*, *Barry the fish with fingers*. Some children have even chosen to create their own jellyfish from a range of materials. We have watched clips about rays, marlin, turtles and talked about what they look like and how they move; using wow words (adjectives) to describe them. We have used this information to write our own riddles for others to guess the sea creature. Can you solve them?

During our maths sessions, we have continued to work using our number skills to solve simple seaside problems involving addition, subtraction, doubling, halving and sharing for example; there were 7 ice creams, but 3 melted. How many were left? There were 3 seagulls and 8 chips. How many chips did they have each?

In our PE sessions we have been busily preparing for our mile run next Friday. The children have all been amazing and successful in persevering to complete the challenge. We thank you in advance, for collecting sponsors for this event, to raise money in support of Julia's House.

### Home learning challenge:

We have completed a phonic check this week; not only to celebrate your child's learning this year, but to ensure that their next learning steps are all ready and in place for starting year 1. Please take the time over the coming weeks to practise the personalised targets that we have sent home.

The EYFS Ducklings' Team

We value our parents as partners. Please leave a comment on any aspect of your child's learning. Things they are enjoying, new learning that they may have shared with you or things that they may be finding tricky.
