reptile	Cold blooded animals that live in water and on land. hey lay eggs on land and have lungs to breathe air. Reptiles have dry, scaly skin.
warm blooded	Animals with body temperatures that usually stay the same
cold blooded	Animals that can become hotter and colder
carnivore	Eats meat. A lion, crocodile, eagle, fox are carnivores.
herbivore	Eat plants. An elephant, deer, rabbit, cow, sheep eat plants
omnivore	Eat meat and plants. A hedgehog, badger, hen eat both
camouflage	Disguise and hide. Colours match the surrounding area to blend in
predator	An animal that hunts for its food,

Things I Will Learn

To name animals and know what their babies are called.
To talk about how animals are the same/different and group them.
To talk about where different animals live.
To explain what animals need to survive.

Things to Talk About and Find Out:

- I wonder how that animal feels/sounds/looks…
- Can you describe it to me?
- How does it move?
- I wonder what its babies are called…
- I wonder if this animal lives alone or in a group…
- What clues are there to find out whether this animal lives in a hot or cold place?
- How are these animals the same/different?
- What do you think carnivores might need to help them hunt for food?
- Would this animal be a good pet? Why do you think that?
