Key words

Coast - where the land meets the sea.
Harbour - a sheltered safe area of water for boats.
Tourist - people who travel for pleasure on holiday.
Town - an area with houses. More than a village but less than a city.
Float - to rest on the top of a liquid.
Sink - to move downward.
Full - when something holds as much it can with no spaces.
Half-full - only half of the container is full.
Empty - there is nothing inside the container.
Habitat - the area that is lived in by an animal or plant.
Coordinate - a group of numbers or letters that show a position.
Map - a picture showing an area of land and it's features.
Feature - an interesting or important part.
Island - land surrounded by water.

A **compass** can be used to help you find your way. It shows four directions: **north, east, south** and **west.**

People have been going on holiday to the seaside for hundreds of years, which is a very long time. When something happened a long time ago, you can say that it happened in the **past.** When something is still happening today, you can say it is happening in the **present.** There are lots of **similarities** and **differences** between seaside holidays in the past and seaside holidays in the present. Talk with your family; can you think of any?

Mary Anning - A famous British palaeontologist

Living things

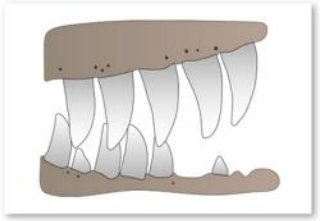

Animals are living things. Living things need food, water, air and shelter to survive.

Dinosaurs

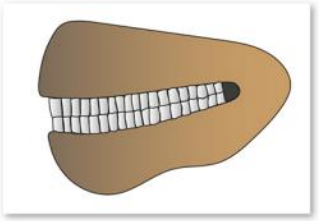

Dinosaurs were once living things. They lived on Earth over 200 million years ago before becoming extinct.

Dinosaur teeth

Dinosaurs like the Tyrannosaurus were carnivores. They had sharp, pointed teeth to cut and tear meat. Dinosaurs like the Diplodocus were herbivores. They had flat teeth to grind and chew plants.

carnivore teeth

herbivore teeth
