Key words

seed – come from the flower or fruit part of a plant, from which a new plant can grow.

root –part of a plant that is usually hidden underground. Roots have two jobs; they hold the plant in the ground and they take water and food from the soil.

shoot – new growth from a seed.

stem– part of a plant that supports leaves, flowers and fruit. It carries water and food between the roots and the shoots.

leaf – part of a plant that takes in sunshine to make food so the plant can grow.

bud – a small growth on a plant that develops into a leaf, flower, or shoot

flower – the most colourful part of a plant. Flowers have petals.

nectar – sweet liquid inside flowers that insects like to drink.

germinate – when a seed starts to grow.

habitat – where an animal or plant lives.

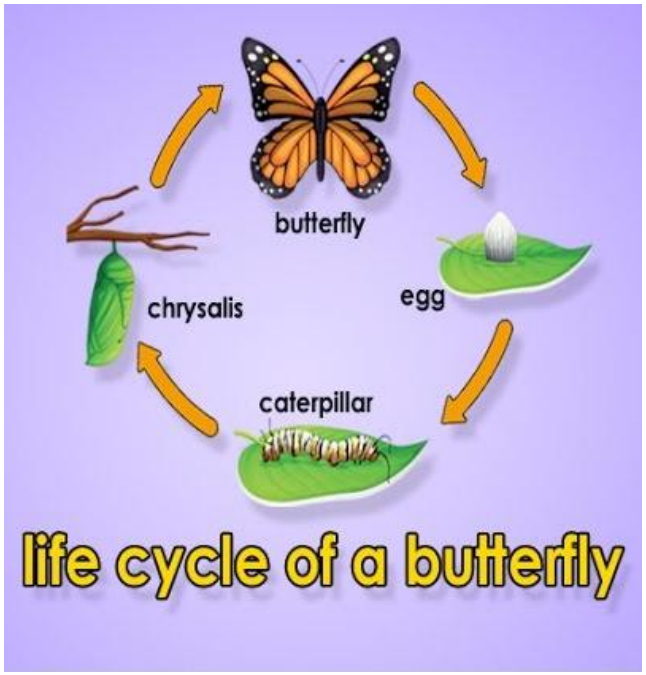

insects – a small animal that has six legs and wings.

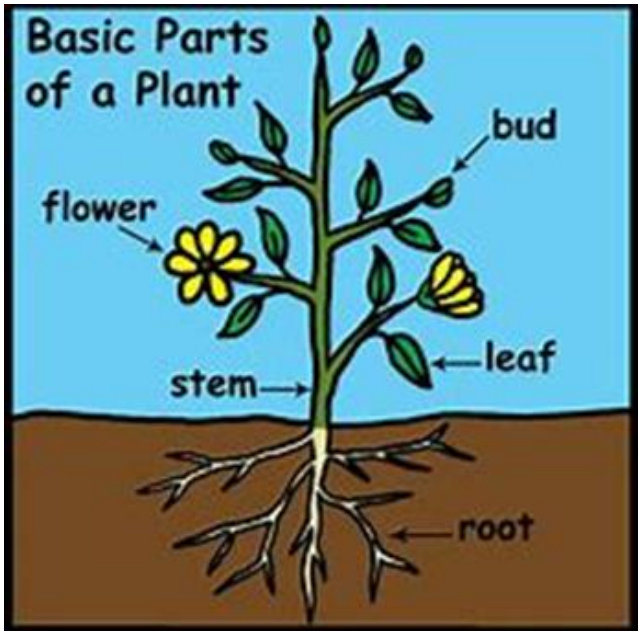

whorl – a spiral pattern on a snail's shell.

foot – the body of a snail.

mini beasts – small animals that live in gardens.

damp – a little bit wet.

					
sunflower	**lavender**	**daffodil**	**daisy**	**buttercup**	**dandelion**
Can you find and name these flowers? What happens when you blow a dandelion seed head?
